iOS Developer

Despre mine

I have decided to transition into a career as an iOS mobile developer. In pursuit of this goal, I have undertaken a structured path to bring me closer to my objective:

*Java Proficiency: To lay a solid foundation, I began by immersing myself in Java. As a practical exercises, I was solving coding challenges on platform Codewars and developing an Alarm app for the Android platform, leveraging Android Studio and Java.

*Exploration of iOS Development: My interest in iOS app development led me to explore Swift, the primary programming language for iOS. With newfound knowledge, I embarked on an iOS project of my own(Alarm app).

*Venturing into Full-stack iOS Development: Seeking to broaden further my skill set in iOS development, I undertook a challenging task: creating an app that retrieves and displays information about the latest space launches from the open-source SpaceX API. This project provided me with valuable experience in utilizing various tools and technologies.

All of the projects I have mentioned, along with their description, can be found on my GitHub profile

This journey reflects my commitment to acquiring the knowledge and expertise necessary to excel in the field of iOS app development.

Ready for relocation to Chisinau.

Worked with:

Development language: Swift;

Frameworks: UIKit, Foundation, AVFoundation, UserNotifications;

Dependency management: CocoaPods;

Storage: REALM, UserDefaults;

VCS: git;

Networking: REST / API / POSTMAN

Third-party libraries: Kingsfisher, youtube_ios_helper.

Experiența profesională

iOS Developer · Self-taught
Mai 2023 - Prezent · 1 an 10 luni

Exploration of mobile development;
Coding challenges on platform Codewars;
Working on own projects:

-Alarm
The app has almost the same UI as Apple's built-in alarm, firing based on local notifications;
Stack: Swift, UIKit, AVFoundation, UserDefaults, UserNotifications;
-SpaceXLaunches
The app shows all the latest launches and their details from open-source API SpaceX;
Stack: Swift, UIKit, Foundation, REST APIs, REALM, Cocoapods;

Service Technician · Agroprombank
August 2015 - Prezent · 9 ani 7 luni

Diagnostics and repairing: ATMs, Self-service payment terminals, Desktops, Laptops, Monitors, Printers, Card embossing machines and other banking equipment;
Soldering;
Install and configure software and hardware;
Bank network maintenance;
Purchase of necessary technical equipment for the bank;
Performing the duties of the head of the department in his absence.

Sales Specialist · Russvet · Москва
Septembrie 2012 - Iunie 2015 · 2 ani 10 luni

Complex supplies of electrical and lighting equipment;
Consultation and registration of new clients, serving existing customer base;
Processing and registration of applications for goods and processing delivery of goods to the customer;
Control of receivables and payables;
Documents management;
Performing the duties of the manager in his absence.

Sales Consultant · Hi-tech
Septembrie 2011 - Martie 2012 · 6 luni

Sales of computer equipment;
Clients consulting;
Performing the sales plan;
Initial fault diagnostics of computers;
Inventory of goods.

Studii: Superioare

Moscow Academy of Economic and Law
Absolvit în: 2013

Facultatea: Faculty of Jurisprudence
Specialitatea: Jurist
